### **DETAILED ACTION**

#### ***Allowable Subject Matter***

1. Claims 2-8, 10-13, 18-19, and 24 are allowed.

#### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1 is being rejected under 35 U.S.C. 103(a) as being unpatentable over Takamori Kazuo (JP 2000-100955).

As to claim 1, Takamori shows, referring to figures 1 and 3, I/O cells 2 formed in cell forming layer together with macro-cells. There are power supply pads (located in the inner region 3) formed in the pad-forming layer and electrically connected to the I/O cells. Signal pads 5 are formed in the pad forming area, electrically connected to the I/O cells and arranged in

an area outside of an area of the power supply pads (located in the inner region 3). Figure 3, shows that the I/O cells are in an area outside of the power supply pads. Please refer to the attached figure, which shows that the signal pads are arranged in an area outside of an area of the power supply pad. Takamori does not specifically disclose that the structure is a multi-layered structure, however, the Examiner takes official notice that it is old and well known in the art that signal pads are formed on a pad layer and input and output cells are formed on cell forming layer. This is evidenced by page 4 of the Applicant's own specification. It would have been obvious to one form the device of Takamori in the manner above to conform to the general practice in the art. This would insure ease of manufacture.

#### *Conclusion*

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
